

Texas Police Trainers LLC Basic Physical Surveillance Strategies for Law Enforcement Professionals (#2028)

Course Description: In this course we will explore the art and science of gathering intelligence discreetly and effectively. As law enforcement professionals, your ability to observe without being seen, to gather evidence without leaving a trace, and to stay one step ahead of those who would evade justice is what sets you apart.

In this course we will embark on a journey to sharpen these critical skills, skills that can mean the difference between catching a criminal in the act and letting them slip through the cracks. Surveillance is not just about watching; it's about understanding, anticipating, and strategically responding to the moves of those we pursue.

In this course the objectives are aimed to provide a comprehensive understanding and skill set for effective physical surveillance in a law enforcement context.

Topics to be covered:

- Understand Surveillance Fundamentals
- Develop Observation Skills
- Master Surveillance Techniques
- Operational Planning and Execution
- Conduct Counter Surveillance
- Collaborate and Communicate Effectively
- Document and Reporting Findings
- Evaluate Surveillance Operations & After-Action Reviews
