A.I. Governance & Training Integration for Texas LE (#38700)

Course Description: The future of law enforcement training is here, and it's powered by Artificial Intelligence (AI). Is your agency ready to harness this technology responsibly? This comprehensive course is designed specifically for Texas law enforcement instructors. In this course, we will equip you with the essential knowledge to responsibly govern, effectively prompt, and strategically deploy AI tools within your agency's training program. Law enforcement instructors will gain the foundational knowledge and practical skills to use AI tools ethically and effectively in training development. Don't be left behind. Prepare your agency's future today. Enroll in Artificial Intelligence Governance and Training Integration for Texas Law Enforcement.

Upon successful completion of this course, participants will master seven areas which includes:

1. Defining Artificial Intelligence and understanding its direct relevance and potential impact on law enforcement training today.
2. Learning robust governance frameworks that ensure AI adoption is lawful, ethical, and transparent. This includes state and federal guidelines, creating policy, managing data privacy, and mitigating algorithmic bias to maintain public trust.
3. Legal and ethical considerations that apply specifically to AI use in both training development and instructional delivery.
4. Practical methods to integrate AI into developing training curriculums, lesson plans, presentations, exams, group discussions, and realistic scenarios.
5. Importance of validating and rigorously documenting all AI-generated content to ensure accuracy and full compliance with professional standards.
6. Using most popular and powerful AI Tools in the industry today, including Copilot, ChatGPT, Gemini, and Perplexity.
7. Demonstrating the use of effective prompting within widely used applications like Microsoft and Google, turning abstract ideas into concrete training materials.
