

Texas Police Trainers LLC FAA Part 107 Certification Test Prep (#4044)

Course Description: The FAA Part 107 Remote Pilot Test Preparation Course is designed to equip students with the knowledge and confidence needed to successfully pass the FAA Part 107 Aeronautical Knowledge Test and become a certified Remote Pilot in Command (RPIC). This comprehensive course provides a structured overview of the Federal Aviation Administration regulations and operational requirements governing small, unmanned aircraft systems (sUAS).

Participants will gain a clear understanding of the key concepts required for certification, including airspace classifications, aviation weather, sectional chart reading, airport operations, radio communications, emergency procedures, crew resource management, and safe drone operations within the National Airspace System (NAS).

Through instructor-led instruction, practical examples, and test-focused review materials, students will learn how to interpret FAA regulations and apply them to real-world drone operations. The course also includes practice questions and test-taking strategies designed to help students confidently prepare for the FAA knowledge exam.

Course Topics Include:

- Regulations & The Law
- The National Airspace System (NAS)
- Aviation Weather & Physiology
- Loading, Performance & Aerodynamics
- Operations & Risk Management
- Tactical Flight Lab (Hands-On)

Who should attend: Public safety personnel, government agencies, commercial drone operators, and individuals seeking to integrate unmanned aircraft systems into their professional operations.

Instructor: Leon Butler

Leon Butler Jr. is a retired United States Air Force pilot with 20 years of active-duty service and over 32 years of combined experience in the aviation industry. He has extensive experience as a military instructor pilot and a USAF civil servant program manager. His background in advanced aviation and defense equips him with a unique perspective on drone technology and its strategic application for public safety and government agencies.

As the founder of Butler Drone Solutions, Leon specializes in 360-degree training and client support that emphasizes mission readiness and regulatory compliance. His company model is rooted in service and is committed to crafting tailored solutions to meet the specific needs of each client, ensuring that law enforcement and first responders can effectively leverage UAS as a force multiplier.
